

SHEIK MOHIDEEN A

4 Years' Experience | Certified in Product Management

[LinkedIn](#) | sheikmohideen2910@gmail.com | +91 72002 80751 | Bengaluru, India

Product-minded Project Manager with 4 years of experience defining the right problems and shipping solutions. At Skysecure, I've shipped 2 AI agents that speed up incident analysis and ticket handling. On a live project with Pine Labs, I shaped GrowthHub's positioning, ICP framework, and pilot-led sales playbook, and built a prototype recommendation engine. My product case studies take on consumer problems: onboarding churn, retention, and trust among first-time users in Tier 2/3 India.

WORK EXPERIENCE

Live Project: GrowthHub (Product Strategy & GTM)

Jul 2026 – Present

Pine Labs × Institute of Product Leadership (IPL) – Product Gigs

Online

- Positioned GrowthHub on verified transaction data rather than inferred interests, and turned an undocumented sales pitch into a six-step playbook built around a 7–10 day pilot with a fixed success metric.
- Defined a tiered ICP framework and industry scoring that chose high-intent customer segments, trading lead volume for high-ticket customers, annual renewals, and multi-city reach.
- Built a prototype audience-creation recommendation engine that asks brands tailored, adaptive questions about their needs and recommends the targeting signals to use.

Project Manager

Jan 2025 – Present

Skysecure Technologies

Bengaluru (On-site)

- Traced slow incident resolution to workflow gaps, led engineering to build and iterate on an AI agent that generates root-cause analyses and corrective actions; resolution efficiency rose 40%.
- Defined requirements and user flows for an AI ticket-management agent on ManageEngine that cut manual effort by 30%.
- Delivered 10+ cybersecurity, cloud migration, and custom app development projects. Set up customer feedback loops and delivery scorecards, replacing ad-hoc check-ins with weekly decision decks that halved those calls.
- Took over projects with undefined requirements: interviewed stakeholders, mapped workflows, and turned loose client asks into scoped PRDs within a week, weighing 3–5 tooling options with trade-offs.
- Designed and launched an internal learning program for security operations and implementation teams; onboarding time dropped by ~40%.

Project Manager

Oct 2023 – Dec 2024

Project Coordinator

Nov 2022 – Sep 2023

Prevaj Consultants

Chennai (Remote)

- Managed 10+ digital products across e-commerce, analytics, and web apps, from problem definition to delivery.
- Led cross-functional engineering, design, and QA teams, translating business problems into user stories, acceptance criteria, and sprint plans in JIRA.
- Served as the primary client interface, presenting dashboards and communicating risks, dependencies, and next steps to senior stakeholders.

Project Management Intern

Olcademy

Mar 2022 – Jun 2022

Chennai (Remote)

- Contributed to UI/UX design in Figma, documentation, and release coordination for the edtech platform.
- Designed test cases and contributed to A/B tests on new features.

PRODUCT CASE STUDIES

- **Snapmint · BNPL Conversion:** Reframed low first-order conversion in the credit check as a trust-and-fear problem for first-time credit users in Tier 2/3 India, not a UX gap. Proposed social proof before credit checks, likely limits before document requests, and total-cost framing from the first screen.
- **FitTrack · First-week Churn:** Pushed back on an onboarding-only brief for 30% first-week uninstalls, traced churn to beginners who wanted motivation rather than tracking, and proposed micro-habits with daily streaks, measured on 7-day activity.
- **DigiHealth · Low Digital Literacy:** Used user research and wireframing to frame diabetes care around missed follow-ups and scattered records, then scoped a shareable-records MVP with vernacular and voice support.

SKILLSETS

- **Product:** User Research, Problem Definition, PRDs, User Stories and Acceptance Criteria, Prioritization, Roadmapping, MVP Scoping, A/B Testing
- **Design:** Figma (wireframes, prototypes, UI/UX), HTML/CSS
- **Data:** Excel (analysis and reporting), Google Analytics, Mixpanel, Power BI Dashboards, Python
- **Delivery:** Agile/Scrum, JIRA, Azure DevOps, Confluence, Stakeholder Management, Cross-functional Leadership

CERTIFICATION

International Certification in Product Management ([Credential](#))

Mar 2026

Institute of Product Leadership (IPL)

Online

- Used user research and wireframing to frame DigiHealth around missed follow-ups and scattered records for diabetes patients, scoping a shareable-records MVP for low digital literacy with vernacular and voice support.
- Sequenced OneStop Home's marketplace roadmap trust-first, with verified pros and line-item pricing before design and products; prioritized Zippy Rides' carpooling MVP with MoSCoW and user stories, deferring loyalty and in-app chat.
- Positioned GreenKart against greenwashing distrust and built its go-to-market plan: a Bangalore-first launch with penetration pricing, a CAC budget, and conversion and repeat-purchase targets.

EDUCATION

Bachelor of Science in Mathematics (74%)

Jun 2018 – May 2021

Guru Nanak College

Chennai

- Department Secretary, Event Coordinator, and NSS volunteer; led student teams that planned and ran academic and cultural events.
- Created reports, documentation, and presentations, and designed event posters, flyers, banners, social media graphics, and certificates.
